

## Problem of Rape and Sex Education

Dr. Shaileshgiri B. Gosai<sup>1\*</sup>

### ABSTRACT

Rape is a hatred crime; proportion of rape is gradually increasing in India. Among of rape on teenager girl is notable while we see figures of rape in India each year. Government has announced National Health scheme named 'Aayushman Bharat' with the aim of children may obtain sexual education and aware regarding health. In which suggestion is recommended in all such curriculam which can access sex education beside health. But due to oppose from some corner, it is not become possible, which should be happened. Some people believe that by giving sexual education it may versely affect to children of tender mind. But, such incidences can be avoided if sexual education may teach in profer and fair way. Minimum seven year prison was sentenced and maximum life time prison was sentenced to accused person who raped on women under posco (Protection of Children from sexual offence) Act till now, But there was no provision of 'hang till death' (strangulation) in it.

*Keywords: Rape, Sex, Sex Education*

### INTRODUCTION:

यत्र नार्यस्तु पूज्यन्ते रमन्ते तत्र देवता: |

I.e. Where women are worshipped, God resides thereof But, this stanza is not totally followed. India is such a country, where daughters are worshipped considering them Goddess of wealth. But, we know how much it is true. We read news regarding violence against women or rape daily in newspapers. Particularly in news regarding rape published in newspaper have at treated attention of people. When we read such news, we have to accept that now women are not safe at home or outside. News regarding rape on women are seen each and everywhere in much proportion but it is also a fact that, rapes on women are not new phenomena, various types of violence on women are happening from ancient times itself. They are suffering from various problems like to disregard them tyranny, beating, principal or sexual exploitation and to kill them after rape. The important and emotional problem among all problems is problem of rape but how

## Problem of Rape and Sex Education

far women will endure all such problems is a question. Incidences of victimization of violence and tyranny are still happening, in spite of dissemination of education among women and they are economically self-reliant. It can be inferred while seeing of present situation that, problem of rape has held serious form among tyrannies on women.

Remedial steps are needed to stop incidences of rape which are happening frequently. Sufficient attention is not emphasized to stop incidence of rape on women. Progress of any society depends upon status and position of women. But, how progress of society is possible, where women are not safe. It is not such that women of poor class are raped but women employees of middle class are raped by police officers, women patients are raped by hospital employees and women labourers are raped by their owners. Incidences of rape on deaf, dumb, mad, blind or women beggars are notable. Such behaviour of male with women is known as barbarity. So lascivious persons when victimize women then women select to death instead of going to court for justice. People of society see towards women as if they are raped women are inspired towards them with feeling of guilt. Experiencing themselves feeling perit against their position and status and bring end of their life. Very few incidences of rape are recorded in Government records. In other cases victimized women do not file complaint to police due to reason of prestige of family or thereof of murder or any other reasons.

Problem of rape is not problem merely of India but it is a global problem. Incidences of rape are frequently happening in other countries also. We will have to accept that proportion of rape is more in developed and prosperous countries, leaving the belief mentality that such incidences are not happening or keep happening in such countries. e.g. incidences of rape are recorded more in other countries like France, Netherlands, Germany and America etc. and countries where incidences of rape are maximum are South Africa, Botswana, Lesotho, Sweden, Nicaragua, Grenada, Australia, St. Kitts and Nevis, Panama, and Belgium etc. All these countries are more happy and weather than India. Even though incidences of rape are happening in these countries like India e.g. according to a report published in 2018 every one from eightieth women is victimized of rape. The important thing is that 83% accused were known to women who raped them and only 17% accused were unknown. Meaning is that, majority of accused are known persons in incidences of rape on women. They are in contact with victimized women by any way like relative, neighbour, colleague or other. 53.2% teenager girls are victimized of rape few 10000 in Sweden of Europe. This rate is 2.6 per 10000 in India, which is very negligible than Sweden. 24 rape cases per 10000 are recorded in Britain which is ninefold more than India. 30 women are victimized of rape per 10000 in America.

Rape is a hatred crime; proportion of rape is gradually increasing in India. Among of rape on teenager girl is notable while we see figures of rape in India each year. e.g. according to report of P.R.B. 34449 child girls were raped or gang-raped in 2014. Incidences of child girl rapes were 34505 in 2015. According to figures of National Crime Record Bureau 38947 rapes were

## **Problem of Rape and Sex Education**

happened on women in 2016. Among which incidences of rape on minor girls were 19675 mean of which is that 107 women are raped everyday.

If we see with reference to Gujarat. 14 women are victimized of teasing, kidnapping and physical pranking everyday. If we see record of two years, 472 women are victimized in 2016 and 479 women are victimized in 2017. In this way, significant increase is happened in terms of rape while comparing the figures of two years. If we see four metropolitan cities of Gujarat, 102 incidences of rape are happened in Ahmedabad in last two years, which are 41 in Rajkot, 58 in Surat and 21 in Vadodara. Incidences of rape are seen more in Ahmedabad with reference to other small cities of Gujarat.

It can be said from satisfied information that, women are more unsafe in other countries than India. But it is not a matter to praise that incidences of rape are less in India than other countries, but such incidences also should not be happened because it is a universal problem and not only of India. It is a universal problem as well as it is a social problem. Due to having of universal or global problem, all nations should prepare a programme unanimously and should be executed accordingly to stop the problem. Then and then it will be stopped.

Incidence of gang rape was happened on Nirbhaya in a bus at 9.00 p.m. on December 16, 2012 in which Nirbhaya was thrown out believing that she is dead. An eight year child-girl was raped in by their owners under whom is working as labourer in which victimized girl was then killed after rape. Dead body of Aashita was found out from Jungle. She was given drugs for aim of rape. A sixteen year teen ager girl was raped in Unnav district of U.P. A girl Guida studying in Std. X was gang raped in Kotkhai forest near Halila village while she was going to school. A 30 year father raped on his daughter in Bihar. A 11 year girl child was raped in Surat. In Italia an eight year girl child was murdered after rape in U.P. after incidence of rape in Kathua-Unav. A four year labour girl was kidnapped, raped and then thrown from a multy-storied building. Such incidences are published in Newspapers which is a matter of worry for the whole society.

Minimum seven year prison was sentenced and maximum life time prison was sentenced to accused person who raped on women under posco (Protection of Children from sexual offence) Act till now, but there was no provision of 'hang till death' (strangulation) in it. But due to such provision, more and more persons were inspired for rape. So POCSO Act is now amendred in which punishment of strangulation is provided now who rape on girl less than twelve years. It is needed that this provision should be strictly followed. Amendment in POCSO Act are as under : Punishment of 10 years or lifetime imprisonment in case of rape on matured women. Minimum 20 year or life time imprisonment in case of rape on girl less than 16 years. In case of gang rape on girl less than 16 year, punishment is lifetime imprisonment or strangulation minimum 20 year or lifetime imprisonment or strangulation in case of rape on girl less than twelve years. Punishment of lifetime imprisonment or strangulation in case gang rape on girl less than twelve

## Problem of Rape and Sex Education

years. Nor previous bail will be given in case of rape on girl less than 16 years. Party of victimized will be given clear fifteen days notice before giving a bail to an accused person. Examination will be done within two months in every case. There is a provision of judgement within six months in case of rape. Incidences of rape can be decreased if all these provisions are followed strictly. There is an important matter is that, proportion of sexually misbehaviour against little boys is also increasing like little girls. So there is a social demand that such accused persons also should be sentenced strangulation because incidences of immoral behaviour on little boys are frequently come in light which is a matter for worry for society.

Internet is more used in era of today. Vulgar scenes, videos and dances which are seen on T.V. Screens in different media are instigating to sexual passion of children. In such circumstances, if true sexual education is not given to children and youth of schools and colleges then such situation may lead then towards instances of rape. Fair counselling with reference to sexual education is necessary from true persons. Moreover, if they are given moral and ethical education, then such incidences can be avoided.

Sexual education does not mean to teach them coition, but to teach them regarding physical-mental changes that happens to teenager boys and girls, to teach them regarding changes happening by natural processes and to inform them regarding allied matters, and it is needed to step forward in this direction. As we have seen above, not merely little girls but little boys are also victimized of sexual exploitation. In such situation, it is needed that teenagers may become informative regarding this subject.

Government has announced National Health scheme named 'Aayushman Bharat' with the aim of children may obtain sexual education and aware regarding health. In which suggestion is recommended in all such curriculum which can access sex education beside health. But due to oppose from some corner, it is not become possible, which should be happened. Some people believe that by giving sexual education it may versely affect to children of tender mind. But, such incidences can be avoided if sexual education may taught in proper and fair way.

Difference of 'good touch' and 'bad touch' is taught to children of first standard in some english medium schools in Bombay foundation of sexual education is done and sexual education is given to them upto IX class in scientific way gradually. So it can be said with this reference that children are acquainted with difference in touch from childhood itself by this method and it some one may try to at once become aware of and oppose it. In this way, steps can be taken in terms of safety from sexual diseases, including AIDS, problem of rape and so many other due to half-cooked knowledge in schools and colleges. Regarding sexuality by following such scientific why of sex education. Some points should be considered while giving them sex education as under :

## Problem of Rape and Sex Education

- Research regarding sex education and problems of puberty. should be happened mentally.
- Teachers should prepared in such a way to give sex education tto students.
- NGOs working in the field of AIDS and sex education should be invited with the aim of having sex education to students in fair way.
- Head of institution should play an active role to mentally prepare teachers to talk with students on this subject, so that teachers and taught may teach and learn this subject innately.
- Public awareness programme regarding AIDS indirectly performs important activity in giving scientific information regarding sex education. so tries should be made to plan such programmers frequently.
